

STREET PRESERVATION PROJECTS 2017

bendoregon.gov/streetpreservation

The Street Maintenance Fund has budgeted these projects in the 2017 construction season.

Why do we choose the streets we choose?

Our *Keep Good Roads Good* philosophy means we maintain and preserve streets with the most cost-effective treatment—the right treatment at the right time.

The worst roads in the city need to be completely reconstructed, which is not an efficient use of maintenance funds. Since these roads are beyond effective maintenance, reconstruction would take place as part of a long-term capital improvement project. These types of projects typically are not funded with street maintenance dollars.
